

# PERMATECH® Degassing

## Degassing Systems

The Permotech Engineering Services Team is an industry leader in engineering the utilization of refractory shapes for aluminum Degassing Systems.

Permotech has the necessary design, engineering and manufacturing expertise to build a Degassing System that will conform to any specific degassing process desired. Any system work is possible from, new liners, repair steel shell, ceramic shafts and rotors to complete turnkey solutions.

## PERMATECH® ADVANTAGE

- Evaluation of degassing requirements
- Pre-fired refractory liner
- Complete insulation
- Material specification
- Engineering & Design of complete system
- Baffle system
- Heating system
- Complete systems drawings

ENGINEERED FOR  
MAXIMUM PRODUCTIVITY
