

Maintenance and Technical

Permatech Maintenance and Technical Services are similar to those offered by other large project management and maintenance companies. Through engineering, consulting equipment manufacture, refractory supply and maintenance planning; Permatech is able to provide a complete range of services to your location. Our in-house team of design experts, and materials engineers are experienced in problem solving and systems improvement, providing significant savings to our customers via on-site assessments, technical support, installation and supervisory services. As the “first choice in refractory technology” Permatech has a myriad of solutions to meet virtually any requirement.

PERMATECH® ADVANTAGE

Refractory Assessments

Maintenance Planning & Supervision

Refractory performance
Operational maintenance scheduling
Inventory and Spares Readiness Planning

Management & Consulting Services

Project Management
Project Scope Planning
Engineering Services
Procurement Services

Equipment Repair - Supervision & Support
